

ACM Xperience FAQs

1. How do we plan to select students ?
 - a. Students will be selected via an Interview.
2. Will there be different teams for each domain or all of them will be working on a single project ?
 - a. Different domains will have different projects but there will be few projects which will require collaboration of teams.
3. If there are multiple projects running simultaneously then how will we allocate different projects to different students ? Some projects require an extra skill set so how do we plan to go around it ?
 - a. Each domain team will have a team lead which has to assure each student in his team is working and collaborating with each other.
 - b. If there is something which the team cannot learn then there can be help provided by mentors.
4. How long will this ACM Xperience run ?
 - a. It is a year-long program where we will be building projects, participating in competitions and learning new things.
5. What if one of the students backs off while working on the projects then how will we fill up the vacancy ?
 - a. If anyone backs off we will be inviting students who are skilled enough to be a part of the team.
6. Will there be any certificate awarded to the students who have worked on the project ?
 - a. Yes, after each project students will be awarded a certificate of completion.
